

15-112, Spring 2015

Manipulating List of lists

A retail company employs 4 employees in its shop. Every month, the manager records the revenue generated by each employee:

	Jan	Feb	Mar	Apr	May	Jun
Fahad	456	235	987	673	776	427
Emad	856	284	413	987	629	196
Mariam	198	936	648	925	435	662
Sarah	174	816	367	357	856	1045

To evaluate the performances, the manager asks you to write a piece software that will be able to answer to the following questions:

- What is the total revenue for the employee i this semester?
- What is the total revenue for the month n ?
- What is the total revenue for the semester?
- Who is the best seller?
- When was the best month?
